## 10 Technical services

### 10.1 Electrical connections

including power consumption and distribution box  
2 kW/230 V 10 kW/230/400 V CEE16  
6 kW/230/400 V 15 kW/230/400 V  
10 kW/230/400 V 20 kW/230/400 V

The electrical supply ends at the distribution box directly above ground or the stand platform. Tampering with the Gifas wiring is strictly prohibited. The exhibitor is responsible for all electrical installations on the stand side of Gifas sockets.

Electrical connection without distribution box  
CEE 32 CEE 63

Your own distribution box may only be used with a valid safety certificate which must be attached to the distribution box. If there is no safety certificate, your distribution box will be tested by an external electrician and you will have to bear the costs.

*Example calculation of power consumption*

6 halogen spots	à 50 W	300 W
1 computer	à 120 W	120 W
1 fridge	à 120 W	120 W
1 coffee machine	à 1000 W	1000 W
		<u>1540 W</u>

1540 W → requires electrical connection 2 kW/230 V

# Information, regulations and rules

## 19 Sustainability

---

Please consider the environment when planning the construction of your own stand. If conventional halogen stand lighting is used, only 10 % of the energy is converted to light and 90 % is lost to heat. You should therefore use LED lighting technology if at all possible. You will reduce your costs thanks to the lower power consumption and be able to order a smaller junction box as a result. In doing so, you will also prevent heat build-up at the stand as well as benefiting from a longer service life and better light distribution.

~~The range of stand structures that we offer for hire is equipped with energy-efficient lighting.~~

## 20 Regulations and rules

---

### 20.1 Stand construction rules

The conditions concerning stand construction and stand design can be found under section 4 of the Rules for Exhibitors at [www.olma-messen.ch/congressevents/aussteller/informationen](http://www.olma-messen.ch/congressevents/aussteller/informationen).

### 20.2 Covered stands

Fully or partially covered stands must be registered together with the stand sketch and approved by the project management in accordance with fire-safety regulations. It is incumbent upon the exhibitor to meet all fire-safety regulations.

If the ceiling structures do not meet the legal requirements, the authorities can order the contested components to be refurbished or removed at the exhibitor's expense.

The fire-safety requirements for covered stands are available under subsection 4.2.2.5. of the Rules for Exhibitors at [www.olma-messen.ch/congressevents/aussteller/informationen](http://www.olma-messen.ch/congressevents/aussteller/informationen).

### 20.3 Fire-safety regulations

Information can be found in attachment 1 of the Rules for Exhibitors which can be downloaded at [www.olma-messen.ch/congressevents/aussteller/informationen](http://www.olma-messen.ch/congressevents/aussteller/informationen).

### 20.4 Stand boundaries and emergency exits

Stand boundaries shall be strictly observed. Emergency exits and escape routes must be clear at all times.

### 20.5 Smoking ban

Smoking (also the smoking of e-cigarettes) is generally prohibited in accessible and closed rooms. This applies to all fair halls and restaurants.

### 20.6 Price declaration regulations

The Swiss price declaration regulations are binding for providers of goods and services. More information at [www.seco.admin.ch](http://www.seco.admin.ch) (Home > Werbe- und Geschäftsmethoden > Preisbekanntgabe).

### 20.7 Catering and economic police regulations

In accordance with the Catering Act and the commercial police regulations, the following regulations must be complied with:

- No catering facilities used may violate fire or food safety regulations.
- No alcohol may be served or sold to young people under the age of 16 or to drunk people. 18 is the statutory minimum age for being served or sold distilled spirits (schnapps, bitters, liqueurs and designer drinks).

## 21 Information for foreign exhibitors

---

### 21.1 Customs treatment

## 22 Data preparation for production of graphics in stand construction

---

If you have booked a stand construction (subsection 7.3), please pay attention to these general requirements for data preparation.

### Production files

- printable PDF, EPS or TIFF, ideally >100dpi
- arrange data in scale 1:1 or 1:10
- convert all writing in paths and convert line weights into contours
- for open data: Send writing and all links
- do not set logos and texts too close to the edge areas
- send data without trim marks, registration marks and colour control strips
- arrange colours in PMS Pantone Solid Coated

### ~~Image data~~

- ~~• do not mix RGB and CMYK data~~
- ~~• the ideal types are TIFF data with LZW compression~~
- ~~• reduce images to background level and delete channels as well as brands~~
- ~~• ideal image resolution in standard 1:1 / 100 dpi at 1:10 correspondingly higher (including – possible losses of quality)~~

### ~~Colours and colour profiles~~

- ~~• ISO coated (CMYK) or Adobe RGB 1998 (RGB), however do not mix~~
- ~~• PMS Pantone Solid Coated~~

~~If you have arranged data in another colour space, they will be automatically adjusted to our colour space. This can lead to undesired colour changes on the print. No liability is assumed for this.~~

### ~~Layout and graphics overview~~

~~It is required either a graphics overview or the classification of the files to the print medium. For larger projects, it is recommended that a dimensioned graphics arrangement is enclosed.~~

### Bleed allowance for textile sails

For the data for sail production, it is necessary to provide the delivered files with a bleed allowance due to the packaging. This is 24 mm on each side of each sail part. Your project manager will provide you with the visible dimensions of the individual sails.

W 193.8 x H 246.8 cm (visual size)

B 193.8 + 4.8 cm (2.4 cm each side) = 198.6 cm

H 246.8 + 4.8 cm (2.4 cm each side) = 251.6 cm

Production size incl. bleed = W 198.6 x H 251.6 cm

### Clean and prompt data transmission by the deadline

In principle we do not access data that is supplied incorrectly. However, if it is necessary, it will be charged CHF 120.00 per hour for the time taken.

The printable data must be supplied no later than XX. Monat. Jahr. In the event of delays in supplying data or if unprintable data is supplied, a production by the deadline can not be guaranteed.

### Data transfer

- For a data volume < 2 GB you can send the data to [info@congressevents.ch](mailto:info@congressevents.ch).
- For a data volume > 2 GB you can send the data via [www.wetransfer.com](http://www.wetransfer.com).

## 23 Contractual basis and GTC
